EL panel description:

Brightness: 600lux (150cd/M²)

Illumination: Pink White Input: AC100~240V

EL life: about 8,000hours, Half life: about 4,000hours

*decaying luminescence will start after half life time, and will become dim enough to require EL sheet replacement when reaching life time. No burnout and flashing dark happened as lighting lamp.

*EL panel for outdoor purpose is open on request, will give special anti-UV and moisture proof.

- **Inverter:** each EL panel will need one inverter to support the illumination work well, and the inverter could keep working well for the new EL panel after replacement.
